

## **Pebble Mine Scenarios**

Scenario 1- Participants are preparing testimony for an Environmental Protection Meeting on how the Pebble Mine will affect the region and themselves. The mine is still in the permitting stage and no development of the mine has taken place.

Scenario 2- Participants are preparing testimony for an Economic Development Meeting on how the Pebble Mine will affect the region and themselves. The mine is still in the permitting stage and no development of the mine has taken place.

Scenario 3- The mine has been in production for five years. Looking back what impact has the mine had on the participant's lives in the last five years?

Scenario 4- One of the earthen dams breaks and discharges tailings in to the river systems of Bristol Bay.
